Dataset Details & Provenance Specification

UCI Dataset 485 (Travel Review Ratings) & OpenStreetMap Live Grounding

1. Primary Dataset Overview

Dataset Name: Travel Review Ratings Dataset (Google & TripAdvisor Reviews)
Source Repository: UCI Machine Learning Repository
Official Link: https://archive.ics.uci.edu/dataset/485/tarvel+review+ratings
Total Instances: 5,456 user review vectors
Total Attributes: 24 distinct travel and urban activity categories
Key Fields: user_id, destination, category, rating, review_text, travel_type, visit_date
Format: CSV / Structured Dense Document Vectors

2. Category Schema Mapping (24 Categories)

UCI Category	Domain Category Name	Primary Tag
Category 1	Churches & Spiritual Sanctuaries	spiritual
Category 2	Scenic Resorts & Mountain Lodges	nature
Category 3	Beaches & Coastal Waterfronts	beaches
Category 4	Parks & Botanical Greenery	nature
Category 6	Historical Museums & Cultural Galleries	heritage
Category 7	Shopping Malls & Retail Arcades	shopping
Category 8	Zoos & Wildlife Sanctuaries	wildlife
Category 9	Local Cuisine & Fine Dining	food
Category 10	Pubs, Bars & Breweries	nightlife
Category 13	Hotels, Villas & Boutique Lodgings	stay
Category 16	Dance Clubs & Late-Night Lounges	nightlife
Category 22	Scenic Viewpoints & Lookout Peaks	adventure
Category 23	Ancient Forts, Palaces & Monuments	heritage

3. Preprocessing & OpenStreetMap Live Grounding

1. Raw UCI 485 rating matrices were normalized and mapped to real destination profiles.
2. Dense document chunks were generated containing highlights, seasonal factors, and lodging baselines.
3. Indexed into local ChromaDB with 384-dimensional dense vectors and in-memory BM25 Okapi index.
4. **OpenStreetMap Integration:** Live Nominatim geocoding and Photon POI query engine dynamically retrieve verified tourist sights and hotels worldwide for uncataloged cities, eliminating hallucinated points of interest.
